This checklist reflects Command requirements for Helicopter Flights to prepare for and conduct internal reviews.

SUMMARY OF REVISIONS

This checklist has been revised to update both content and references as well as to convert to the proper format.

- 1. References have been provided for each critical item. Critical items have been kept to a minimum and are related to public law, safety, security, fiscal responsibility, and/or mission accomplishment. While compliance with non-critical items is not rated, these items help gauge the effectiveness/efficiency of the function.
- **2.** This publication establishes a baseline checklist. The checklist will also be used by the Command Inspector General (IG) during applicable assessments. Use the checklist at **Attachment 1** as a guide only. Add to or modify each area as needed, to ensure an effective and comprehensive review of the helicopter flight operation's program.
